

MICO BATHROOM BOOK 2019

A new bathroom is an exciting opportunity to create a beautiful, peaceful space in your home.

Whether you're revamping an existing bathroom or creating a brand new room, you'll want something that mixes function and aesthetic – something that does what you and your family need it to do, and also reflects your personal style. There are many things to consider when planning your dream bathroom, from the curves and colours of tapware to how you'll fit everything into the space available.

The Mico Bathroom Book 2019 is your secret weapon for bathroom builds. It will help you answer all the questions you have about bathrooms, as well as some you haven't

thought of yet. Flick through these beautiful pages to see where your dreams could take you. Fall in love with our amazing products designed and manufactured all over the world from New Zealand to Europe and everywhere in between. Read up on our modern approach to design, and learn how to blend form and function seamlessly and take full advantage of limited space.

All you need to begin the process of making your bathroom a reality is right here, including information on sustainability, tips from an expert in bathroom design, and a useful bathroom planner. Allow us to guide you...

ADDITIONAL INFO

Everything else you need to create a perfect bathroom, from supplier details to the address of your local Mico store.

A LUXE NEW APPROACH

Bathroom design has never been such a hot topic, as standard, simple spaces are reimagined into something that indulges the user as much in look as it does in function. In 2019, bathrooms are all about the uncomplicated luxury.

It used to be the wow factor in interior design was reserved for living areas. Not any more. As the bathroom has evolved from a space of function into more of a sanctuary, it has also become an area where aesthetic appeal is not optional – it's key.

No longer are identikit, faceless bathrooms the norm, in 2019 practical simplicity has been replaced by something more warm and inviting, memorable and uplifting.

Clean lines have been given depth with layers of texture; while soft and soothing tones are enhanced with definition using beautiful pops of colour. The function of the space is still ever present, but it is smart, as the latest technology ensures ultimate ease of use; the hard work is done for you.

These latest concepts are not constrained by space or budget, their very individual nature ensures they work as well in a small apartment ensuite as they do in an oversized family bathroom.

The overall feel is one of uncomplicated luxury. There is no fuss or jarring, the space works as a whole, but it has flashes of brilliance. It weaves together many of the emerging trends in interior design, to create a room that delivers on every level.

Some of the themes central to bathrooms in 2019 include:

CURVES

To accentuate the sense of luxury, everything has gone a little softer and more curvy. Last year saw the arrival of more egg-shaped and non-symmetrical curves, and that organic feel continues moving forward, as clinical lines make way for plumper baths, voluptuous bowls and big round mirrors.

COLOUR

Bright white has had its moment, and colour previously reserved for walls and floors has moved into baths and bowls, with the finish matte rather than gloss. Tonally it's dark and moody – think soft plums, olives, jades and deep indigos – complemented by a new wave of earthy neutrals, in soft shades of sand, ivory and sage..

BLACK ACCENTS

The popularity of black is showing no sign of waning, having moved from tapware into baths and basins – and now even shower framing.

Classic monochrome is taking on a new level of interest with the likes of patterned black and white tiles, which are given sophistication against a backdrop of slates and pale greys.

GOLD

Adding depth, dimension and luxury, gold is the metal of the moment – and not the shiny, showy yellow incarnation of yesteryear, but a warmer shade of soft champagne. Beautiful rather than bold, it is best used sparingly but effectively, with hints in the occasional handle or mirror frame adding a lush gorgeousness.

WABI-SABI

Moving away from a cookie-cutter perfect aesthetic that lacks character, wabi-sabi has emerged as a key trend in interior design, as seen in exposed old timber floors and unexpected shapes in basins. It embraces the simplicity of authentic, natural materials such as wood and stone, as well as imperfections within those.

TOUCHABLE TEXTURE

The emphasis moving forward is on the tactile, embracing the wide range of materials available. From smooth marble to versatile granite, stone continues to provide a timeless element, while tiles are becoming more varied in look and shape. Bathroom wallpaper, especially that in bold designs with raised prints, is now much sought-after.

DARK TIMBER

While the wood look maintains its dominance, in 2019 once prevalent Scandi bleached varieties have made way for something darker, richer and more luxurious. The likes of mahogany, walnut and dark oak create a more indulgent, warmer feel, which is the perfect contrast to those colder ceramics.

TERRAZZO

Formerly viewed as a cheap flooring, a mishmash of materials bound together in a rough mosaic, today terrazzo is an on-trend and high impact look that works as well in tiles as it does in light fixtures. This year it has a more natural matte finish than in the past, and is more considered in terms of colours and arrangement.

LAYERED LIGHTING

The single overhead light has long gone, and with LED strips and pendants, backlighting and spotlights, the bathroom can be divided into task zones and relaxation areas, creating the perfect ambience. Motion activated lights are also coming into play to further optimise user experience.

TECHNOLOGY

It was only a matter of time before our smart homes extended their reach into the bathroom, and finally touch screens, mirror art and sensor-activated capability has been realised. Taps with motion detectors are making their way into private homes this year, and LED faucet lights and automatic demisting mirrors are becoming more widespread.

MICO TIP

When playing with trends, balance is the key, combining textures and tones, function and innovative design, to avoid overwhelming the space. Mico's in-store experts will help you achieve the perfect synergy.

NOT SO REGULAR FIXTURES

The essential components in a bathroom are no longer just part of the wallpaper, in 2019 colour, texture and pattern ensure every element can sing. It's simply a case of addressing each, step-by-step...

THE BATH

What epitomises luxury more than an opulent freestanding bath? Increasingly the centrepiece of a modern bathroom, this year they have been reimagined in both colour and form. The dramatic look of bicolour, featuring contrasting colours inside and out, is evolving, as moody, earthy shades replace black and white. When it comes to shape, the options are ever more varied in both size and construct, but there is a clear move towards a softer look. As for positioning, when space allows, your statement bath should take pride of place, ideally on a raised platform. Want a more unique placement? What about making the bath a feature in the bedroom, or on a deck? As boundaries within the home fall, and bathroom fixtures become akin to furniture, these pieces no longer need to be tucked away.

THE SHOWER

For an uncomplicated, seamless bathroom look, it's hard to beat an open shower and its sheer sense of spaciousness. The key here is layering the space, considering a feature backdrop of glass, niches for storage instead of glass shelves, plus a foot nook for ease of shaving. In 2019 a simple slide rail shower will commonly be complemented by a rain shower emerging from the ceiling, and for the full immersive experience, wall jets will be included. Larger spaces cater for his and hers, and all can be controlled with the one push-button mixer, pre-set to your prefect pressure with customized spray settings. To illuminate the space, strip LED lighting will create the perfect ambience, although for those wanting to be fully soothed, chromotherapy showerheads emitting soft beams in healing shades are becoming popular.

THE VANITY

Bulky options gobbling up floorspace have had their day, and now it's time for floating vanities to shine, helping to simplify and enlarge the appearance of an area. The clean look they emanate is further enhanced with the disappearance of fussy handles and drawer pulls, to be replaced with integrated options. Wood is becoming the material of choice, with trends moving away from the lighter options into richer versions, adding warmth and texture.

THE BASIN

Designers have turned their attention to this once-overlooked essential in recent years and basins can now rival baths when it comes to being the hero of the room. To avoid the two competing, consider a bowl which echoes the look of the tub, tonally and texturally. While rustic stone options have become more widespread, in 2019 metallic basins are emerging as a favourite, with soft gold a particular standout.

THE TAPWARE

Formerly one of the less dynamic parts of this space, tapware is now hot property. The choices are endless when it comes to materials, and playful new designs make a true feature of how your water emerges from the wall. While black is continuing in its dominance, frontrunners over the coming year include soft golds and brushed brass, as well as the more unexpected gunmetal and rich chocolate.

CUPBOARDS AND SHELVES

Open shelving is back in vogue, adding a feel of lightness and space. When used for piles of plush towels, delicately scented candles and attractive beauty bottles, these enhance that feel of a spa, just beware of overfilling; this is more about the aesthetic than the storage. When it comes to places to tuck away essentials, floating cupboards, which now come in a variety of shapes, sizes and materials, are the way to go, ideally with internal lighting.

THE TOILET

Rimless toilets are no longer a luxury, they are becoming standard in 2019 as a more efficient, hygienic and easier cleaning model. And we are making this bathroom essential work harder in other ways. Toilets with lids that automatically open and which feature integrated lighting, heated seats, white noise to disguise unpleasant sounds, built-in deodorisers, multiple washing modes and self-cleaning functionality are in hot demand. This is not coming at the expense of aesthetics, with elegant, sophisticated designs now widespread.

WALLS AND FLOORS

Tiling floor to ceiling is now common, with shapes moving away from the rectangular into the more unexpected; think hexagons, diamonds, Moroccan arabesque and fish scales. Different tactile materials are also in-vogue, including darker marble and honed concrete. Just keep in mind balance: while tiles can have a place on the ceiling as well as the floor, too much of one bold choice will overwhelm the space. For those with an aversion to grout lines, there are more options than ever, from glass - which can feature printed imagery - to bold patterned wallpaper. Of this year's trending colours, earthy tones like forest green as well as pale greys are among the easiest to work with, although all shades of blue, from indigo and denim to rich turquoise, are also taking their turn in the spotlight.

MIRRORS

Bigger is better in 2019 as elegant mirrors are used to create a sense of space, adding light and dimension to a room. Whether you go for wall-to-wall or something with an intricate frame, size does matter. Round versions are becoming a go-to for interior designers, some featuring a decorative glass shelf across the bottom, with most backlit. To combine aesthetic and function,

recessed mirrored cabinets help maximize storage, while the new wave of smart mirrors are starting to make an impact.

ACCESSORIES

Those little touches that make a house a home – art, greenery, a comfy chair, treasured ceramics – have well and truly established their place in a bathroom, meaning personalization is more easily achievable than ever. This year pineapples – in everything from prints to towels – are replacing former favourite the cacti as decorative accents of choice. And don't forget the essentials; the likes of towel rails, roll holders and toilet brushes can seamlessly match the tapware, blend into the walls or display a little flair.

MICO TIP

To better visualise how all these elements come together let Mico's 3D Design Planner do the hard work for you. Simply head online, bring up a floorplan which you can adjust to your shape and dimensions, and select and position your favourite Mico products. Then sit back and review a high resolution 3D image of how your perfect bathroom will look.

A beautiful main bathroom as seen on Three's The Block NZ 2018.

GREAT & SMALL

In 2019 space is at a premium for many, but that doesn't mean those working with a compact area have to compromise on style.

Gone are the days when size was a barrier; using the latest design ideas and bathroom pieces, your snug bathroom, ensuite or powder room will be comfortable, not cramped. The key is efficiency, utilising every centimetre of space to create something that feels spacious no matter what its dimensions.

FLOAT YOUR BOAT

The more floor space that is visible, the larger the room will look, so floating vanities and cupboards as well as wall-hung toilets are essential. These pieces don't need to be bulky, elegant slim-line units are widely available.

SHOWER POWER

When it comes to the shower, aim to avoid enclosed versions with raised trays, instead going for more seamless, walk-in options using clear glass. Don't feel a square box of a space is needed for this; it can fit the shape and size of your room. And if you want a bath, opt for one of the latest small sizes, and consider positioning it within the glass-fronted walk-in, to create a full wet area for bathing and showering.

LIGHT AND BRIGHT

Light colours are the not-so-secret weapon when it comes to creating a sense of space. This doesn't mean you have to stick to white, play with warm beige and soft greys, colours that reflect, rather than absorb any available light. While adding a single dark colour wall, perhaps with a graphic pattern, will create depth, in 2019 the concept of sticking to a single colour is on the rise.

TOUCHY FEELY

Because your palette will be fairly neutral, play with texture to energise the room. Explore using marble, granite and concrete – anything

which creates that tactile feel while adding interest. Large format tiles give an impression of more space, but change these up by using contrasting ones to create an eye-catching panel or to tile niches.

MIRROR, MIRROR

Don't underestimate the power of mirrors to double the feeling of space, while also adding a showstopping element to your room. Although wall-to-wall is extremely effective, recessed cabinet options create storage, which is at a premium when square meterage is limited.

CUT THE CLUTTER

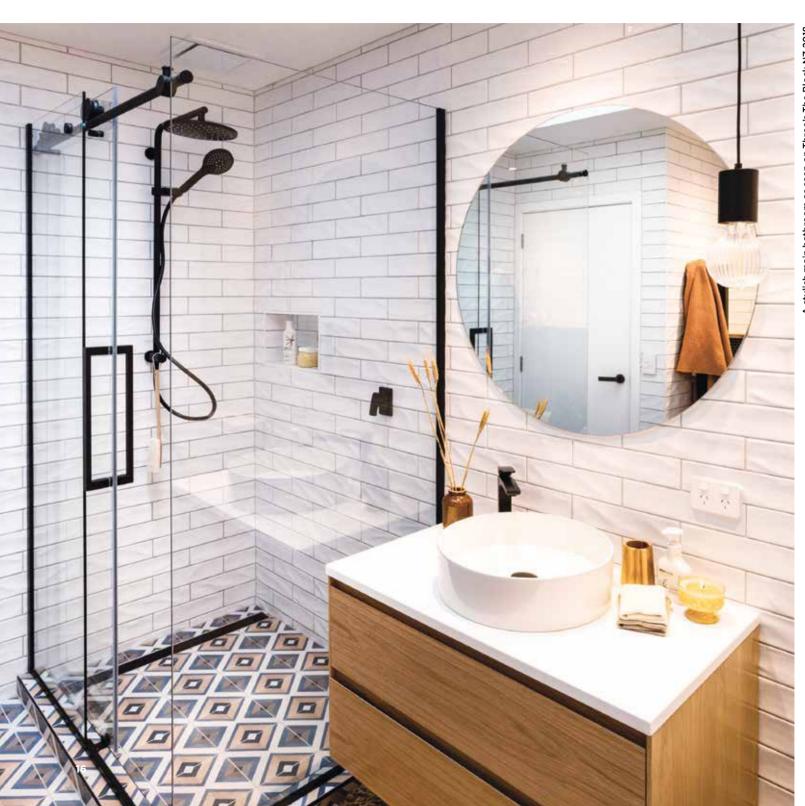

Less is more when dealing with small bathrooms, so aim to either keep lotions and potions tucked away, or ensure they are tidy. If you don't have room for cabinets, hooks and floating shelving are good storage options, but consider how you place items on these, so it isn't a busy jumble of clutter – attractive baskets can be a good solution.

DID YOU KNOW?

The World's Smallest Toilet, 'Chisai Benjo', was created by Takahashi Kaito at a nanotechnology firm in Japan. Made by etching silicone with an ion beam, it could only be seen when it was magnified 15000 times. The fact it was completely unusable seems to have been irrelevant...

THE EXPERT TOUCH

Mico's resident style guru and national category manager for bathrooms Louise Cook shares her insider tips to help you achieve the bathroom of your dreams.

Q. HOW IMPORTANT ARE TRENDS WHEN IT COMES TO DESIGNING A BATHROOM?

A. Very important in terms of getting people inspired and giving them ideas. Bathrooms have changed so much in recent years, as people have questioned how they can turn a functional space into something they enjoy being in. You are in your bathroom everyday, so like a kitchen it is important to ensure this pace is just perfect for you and your family.

Q. HOW DO YOU BALANCE TRENDS WITH CREATING SOMETHING THAT WON'T DATE?

A. It's a fine line, but these days people aren't building bathrooms to last 25 years or a lifetime - that era has come and gone. And there are things you can easily change - for example, it's easy enough to swap out a tap, so you can experiment with the colours in tapware now, then go for something else a couple of years later.

Q. CAN YOU SUGGEST WAYS TO UPDATE A BATHROOM WITHOUT EMBARKING ON A FULL-SCALE RENOVATION?

A. Changing out a big feature like a vanity, and perhaps getting one in a soft wood, can transform the whole look and feel of your bathroom; it's easy enough to do and it's not a huge expense. You can also play with colours and textures, perhaps adding a feature wall to give the space a refresh. Because it's a small room it really doesn't need much to create an amazing new look and feel.

Q. IS IT POSSIBLE TO CHANNEL THE LATEST LOOKS WITHOUT IT COSTING A FORTUNE?

A. Absolutely. Our private-label brands have pieces that are a lot cheaper, but offer the same look and style as you might get somewhere else. For example, you might want a stone bath that's \$5000 - but it's not in the budget; we can

get you the same look for less and still great quality. That said, our team can also work with you to help you invest in that one piece that becomes the focal point – but keep it more basic elsewhere to balance that cost.

Q. DOES AN AWKWARD OR SMALL SPACE LIMIT CHOICE?

A. Not at all, products have evolved as we understand small spaces better. Back in the day you might have only been able to get a bath of a standard size, now there is a wide range of variety. It's the same with showers, they're not basic square spaces any more, plus you can get vanities that don't protrude from the wall as much – even toilets have evolved.

Q. IS IT POSSIBLE TO GET GORGEOUS LOOKS SHOWCASED OVERSEAS HERE IN NEW ZEALAND?

A. Yes, we've got some fantastic suppliers in places like Italy and Germany that we partner up with; we're very much aligned with these guys. New Zealand tends to follow the European trends, our inspiration is based on what is happening there and we can access those pieces for you.

Q. AS HOMES GET SMARTER, HOW IMPORTANT IS FUTURE PROOFING IN BATHROOMS?

A. Future proofing currently is just being aware of it, understanding where you see it fitting into your life and starting off small. I see smart bathrooms heading into the areas of controlled water and lighting – both of which you can do down the track. You might start with LED lights in your vanity or mirror as a very basic and simple way to ease into creating a lasting space, and then you can move into introducing smart technology around your water control.

Q. IS IT POSSIBLE TO HAVE A MORE SUSTAINABLE BATHROOM?

A. A lot of the overseas companies we work with have products that cater for that, and while in New Zealand we don't have the restrictions they have elsewhere – for example in Australia all their products have to be in dezincification resistant brass – at Mico we do have those options available. We have products with water flow limitations on basin mixers and showering and all our products have WELS star rating, so people can be aware what their water efficiency is.

MICO TIP

Louise's recipe for success: Planning.

"It can take time but planning is easy enough to do, and that side of things is free with our team. Our staff love getting creative and making it work for you. Our 3D Design Planner also means they can really help you visualise the possibilities. From there, we can understand your needs/requirements, access products to fit these requirements, recommend plumbers in the area, help with budgets, support through the project as much as possible"

HOT LIST

Louise's favourite new innovations:

1. TAPWARE

It's really exciting to see where we've come with tapware in the past few years. Previously there was only chrome, then there was a slow evolution to black, and now in the past 18 months we're seeing the introduction of coloured options. You can pretty much get anything you want, and with the softer colours – the golds, nickels and stainless steel – you can make a stunning change without feeling you're going too far out.

2. TECHNOLOGY

Whether it's the way toilets are now flushing or how we're seeing lighting evolve in our bathrooms, you can't go past technology and what we're doing these days. Things like lights in drawers and toilet seats – you really don't have to have full, bright lights in a bathroom anymore, instead lighting is being used to not only create ambience but offer a safety element as well.

3. TEXTURE

I love the texture that is coming into our bathrooms – particularly with the trend towards wood and nature elements. It's mainly happening around the vanities, and with the colour choices available you can create a really showstopping piece. Also we're now thinking about how the vanities match the tapware and ensuring all those materials, colours and textures work together.

4. THE NEW FUNCTION

I like the way the products are evolving based on what our needs are – so limitations really are removed. We don't feel we can't put a bath in a space because it's too small; there isn't that sense something simply isn't possible. I love the amount of choice we have out there – it can be daunting but it's also fantastic.

A NEW FLUSH OF INNOVATION

As design and technology advance, the bathrooms of tomorrow will work harder than ever to cater to the needs of the user, while exuding the look of effortless elegance. Prepare to be transported to a future that was unimaginable just a few years ago....

Imagine a bathroom built to fulfill your every desire. As you step into this sumptuous space, it recognises who you are, your favourite scent wafts through the air conditioning, and the shower turns on at your preferred temperature and pressure using your ideal combination of jets. While you undress, you can ask your interactive mirror for the local traffic report, before your perfect music floods the room and the lights dim to the setting you find most soothing. After you've washed and your body has been gently blow-dried, you take a moment to read the data created by your floor, which has automatically weighed you, and by your toilet, which has analysed your waste.

It might sound like something out of a science fiction movie, but you only have to look at the average unrenovated bathroom to see how far we have come in terms of both form and function in recent years. And with innovation at an all-time high, it seems the sky is the limit when it comes to just how smart, indulgent and aesthetically unrivalled the bathrooms of tomorrow could be.

Some of the luxuries which are expected to become mainstream over the coming years include:

HOT AND COLD STORAGE

While pulling on a snuggly thick dressing gown after bathing is one of life's little pleasures, how much better would it be if that robe had been gently heated for you? Warming drawers are poised to move out of the kitchen and into the bathroom where they will heat linens and clothing, adding an extra level of comfort to the simple act of getting dressed. But it's not all about the warm, fridges for medicines and beauty products that benefit from a cooler temperature are also expected to become more commonplace.

AUTO ORDERING

It can be frustrating to reach for the shower gel and discover your partner has snagged the last drop, not to mention the fact you've run out of face cream. As the likes of voice-activated personal assistants rise in popularity, so are the options for online ordering, meaning your shower could soon be connected to a service that will automatically organise that fancy shampoo you can't do without.

A HEALTH ADVISOR IN YOUR MIRROR

A mirror that simply shows your reflection is increasingly dated. With smart mirrors that respond to voice commands, stream TV shows and advise on the sport results now available, tech gurus are seeing how far they can push what was once a fairly ornamental addition to a bathroom. Concerned about your eyesight? Your mirror could perform retinal scans and advise of issues. Wondering about that mole on your back? Check out your reflection while it's analysed for you. And when you don't need the mirror for its high tech myriad of functions, you can switch the whole thing into a piece of art showcasing your favourite image.

THE CALL OF NATURE GETS TECHNICAL

Japanese innovators have already transformed the once simple toilet into something with sensors and washing options, and with voice-activated flushing currently on the market, there seems no limit to where the WC can go. Capabilities tipped to become widespread include recognition software that automatically adjusts the toilet to your height, and waste analytics which advise of pregnancy or health issues.

SAVING THE PLANET

We're all increasingly aware of the need to conserve energy and water, but it can be tough when it comes at the expense of a gushing shower or a properly flushing toilet. Happily, innovations that solve that conundrum are available and expected to grow. Water recycling showers such as OrbSys, which avoids wastage by purifying then immediately reusing heated water, are likely to become a popular way of reducing both water use and energy consumption. Similarly, innovations which involve using wastewater to flush the toilet are tipped to be the way of the future.

TECHNICAL TAPWARE

Currently the focus is on aesthetics in tapware, but behind the scenes these seemingly simple elements of the bathroom are being revamped and modernised. Faucets that turn on and off automatically when your presence is detected are making their way into private bathrooms, and LED lighting technology is becoming more widespread, advising temperature which can be adjusted remotely. Research is also ongoing to optimise experience while conserving power and water.

COMPLETE CUSTOMISATION

While there are more options than ever to choose from when it comes to fitting out your bathroom in 2019, there are still those who struggle to find a bath that truly envelops the body and a comfortable toilet seat shaped perfectly to their dimensions. That is unlikely to be a problem down the track as 3D printing arrives in bathrooms, allowing users to shape every fixture to their personal dimensions.

BEFORE YOU START

There's one room in every home where sanctuary is found, personal intimacy is cherished and time is spent to reflect on oneself. Creating the perfect bathroom requires not only a marriage of form and function but space and aesthetics as well.

Whether your goal is to create a functional, comfortable family bathroom or a private retreat, there are numerous handy tips and hints that can help you get things moving!

Mico Bathrooms has many years of experience in the industry, and is highly regarded for its selection of products that combine quality with style.

All items are sourced exclusively from reputable manufacturers. Our team of nationwide Bathroomware Specialists can assist you when selecting your bathroom products, as well as introduce you to reliable tradesmen for all your installation requirements.

GETTING STARTED

The Mico 3D Design planner is perfect for bringing your dream bathroom to life! You can explore your space with this helpful tool and select from our wide range of bathroom products. Once you are happy with your design, simply send it through to one of our expert consultants who will take care of the rest for you. Go to mico.co.nz/designplanner for more details. If you prefer putting pen to paper there is also a helpful tool on page 18 that will help you get started in making your dream bathroom a reality.

There are always a variety of options when it comes to buying a bathroom. You can go at it alone, sourcing each individual item and hiring a professional tradesman as required, or you may choose to use an interior designer, architect or builder. As a specialist Bathroomware company, Mico Bathrooms can help with whichever option you choose. Having developed strong relationships within the design industry, our bathroom consultants are experienced in working together with clients and designers to accurately specify product according to plans and budgets.

HOW TO GET THE MOST FROM MICO BATHROOMS

Call into your nearest Mico Bathrooms branch anytime Monday to Saturday* if you would like to talk to a Bathroom Specialist. Let us know what time you will be coming and we will make sure one of our qualified specialists is available to answer all your questions.

The Mico Bathrooms team will work together with you or your designer to ensure you have all the products and installation items to finish the project.

They will also provide all the quotes and specification details required for your builder, plumber or drainlayer. Mico Bathrooms will order the goods for you once the deposit is paid, ensuring your products will cost you exactly as per the stated quotation.

Our prices are in \$NZD and include GST.

NB: Supply availability, prices and codes may change throughout the year. Mico Bathrooms reserves the right to alter accordingly.

DELIVERY

Much of what you see in this catalogue is available within five working days. However, some furniture, spa baths and designer items are manufactured to order and can have a lead time of some weeks. More specialised products can take up to three or four months if being delivered from the Northern Hemisphere.

RETURNS OR EXCHANGE POLICY

 Goods supplied in accordance with the buyer's order can only be returned with the express approval of Mico Bathrooms.

- Requests to return goods must be submitted within 10 days from the date of supply and the original invoice number must be quoted.
- III. Where goods are accepted for credit they must be returned in original condition, inclusive of all packaging.
- IV. Mico Bathrooms reserves the right to levy a restocking fee against any returns they may agree to accept. Such fees may be up to 20% of the invoice price and levied at Mico Bathrooms' absolute discretion.
- V. Goods specifically imported, procured or manufactured on behalf of the buyer can only be returned on such terms and conditions as Mico Bathrooms agrees.

EXCLUSIVE BRANDS

More than any other room in your home, your bathroom is your personal, private sanctuary.

For you to imbue that sanctuary, that very private space, with the perfect blend of sophistication, functionality and personal style, Mico Bathrooms offers a range of top-quality, exclusive brands from a select list of preferred suppliers. Drawing on customer and staff feedback, and backed by more than a century's knowledge of plumbing products and brands, Mico Bathrooms has carefully chosen these leading national and international brands to meet the needs of New Zealanders and the unique conditions of our beautiful country.

As you choose your bathroom fittings, your plans and dreams will be inspired and developed through the expertise and support of Mico Bathrooms' staff and the skilled tradesman who undertake the installation.

RAYMOR

Raymor's comprehensive bathroom range will complement any style of bathroom in any New Zealand home – from character charm to contemporary cool.

Simple, modern design, fine engineering and value for money distinguish the Raymor collection, with new developments continually being introduced. With a full compliment of products across every aspect of your bathroom, Raymor proves it commitment to meeting the requirements of its New Zealand customers. All Raymor tapware has a 25 year warranty.*

ADESSO

World-class Adesso bathroom products manufactured by world leaders in the industry bring sought-after European styling to New Zealand within an affordable price range. For those seeking a contemporary bathroom the Adesso range offers edgy, minimal design whilst at the same time being functional and always tasteful. Manufactured globally and engineered to exacting standards, the Adesso range of toilets, basins, baths, furniture, accessories and tapware are designed to meet the demand for performance, quality, and value for money. Adesso presents an integrity of design that never disappoints. All Adesso tapware has a market leading 35 year warranty.*

PAFFONI

Expertly crafted in Italy, the centre of design innovation. This range of quality tapware is produced by a family-owned company established in northern Italy 60 years ago. Its two tapware divisions, Rubinetteria Paffoni SPA and Fonte Water House, create both classic

and contemporary tapware, which they export to over 30 countries. Renowned for strong design Paffoni tapware represents absolute value for money, while Fonte produces cuttingedge, contemporary tapware tooled from solid brass. Between them these Italian brands offer tapware for every style of home, from traditional to truly modern.

KOHLER

A focus on bringing a combination of quality and distinctive style to its range of bathroom products has seen Kohler grow and develop to become a world leader in the industry. Founded in America in 1873, the company has continually set new standards in design, craftsmanship and innovation.

As a result, their selection of bathroom products offers diversity, functionality and singular quality across a broad range of price points, meaning dreams can be fulfilled no matter the budget.

PHOENIX

An Australian owned company with a 30 year history in manufacturing tapware, showers and accessories, Phoenix has a founding principle to develop new products of outstanding quality and originality.

Phoenix believes it is important to develop a strong brand identity. Investing in the brand is imperative to future growth, and to support beautifully designed and innovative product.

As a proud winner of iF design award and 3 Red Dot awards in 2017, Phoenix is the first Australian company to receive 4 International Design Awards in the same year. Their relentless focus on design and innovation

ensures customers will always enjoy the best bathroom experience. Offering tailored design solutions and bespoke manufacturing services to customers globally. The Australian design team have a collective 72 years' experience in the design industry and have been recognised for their outstanding achievements throughout this time.

VANITIES

DESIGN CONSIDERATIONS

The ultimate purpose is to wash, clean and store.

IMPORTANT TIPS

- When designing their bathroom most people start by choosing their tiles and colour scheme, so in order to make the right colour choice for the vanity, it's a good idea to take a tile with you. For example, the Adesso Urban vanity, in Gun Metal is a popular choice to complement white or grey-tone tiles.
- · Consider mirrored cabinets for extra storage space, as well as assisting and accommodating your daily beauty regime.
- The perfect vanity takes time to be built this requires your attention early in the selection process to minimise delays and avoid complications to your renovation or new build.

TAPWARE

DESIGN CONSIDERATIONS

Mico takes pride in offering a vast range of tapware brands with proven quality for all budgets. This has been crucial when developing an impressive selection of New Zealand and International brands such as Kohler, Raymor, Paffoni, Adesso, Phoenix and Hansgrohe. Feel confident asking the experts at Mico. We are here to guide you to the best solution for you and your home.

In the world of tapware there is a perfect tap for every style, function and budget. The design of the bathroom will influence the style of tapware you choose.

SOME IMPORTANT QUESTIONS TO ASK YOURSELF ARE:

- Do I use this tap a lot and is it nice to touch and manoeuvre?
- What don't I like about my current tapware?
- Does it work with the style of my vanity?

- Is it going to work with my current water pressure?
- Do young children or elderly use the tapware?
- Does it provide a good warranty?

KITCHEN TAPWARE

DESIGN CONSIDERATIONS

Cooking has long been more than just a routine task, it encourages social gatherings shared with friends and family. The kitchen is considered to be the heart of a home; increasingly sophisticated kitchen tools and the propensity to experiment with world cuisine both mean that an efficient delivery of water is essential to a well functioning kitchen.

WHAT MAKES A GOOD KITCHEN TAP?

Your tapware can be the centrepiece or a low-key functioning tool for your kitchen. Looks do matter, however the best designs hold intelligent functions and sensuous ergonomics. Functions include pull out spray for ease of use when preparing the vegetables, to filling up that vase that won't fit under the spout. Ergonomic handles help arthritic hands. A solid cast, brass spout with minimal grooves can eliminate food build up and will stand the test

of time in a busy family home. The better the quality of the cartridge, the better your tap will perform under high use. Looking after your tap is just as important as selecting a well made tap - warm soapy water is all that is required. Household cleaners and microfiber cloths may actually damage your tapware. The options are endless for design and functionality, so ask a consultant at your Mico showroom for a demonstration.

SHOWER TAPWARE

DESIGN CONSIDERATIONS

Shower tapware is the single most important decision when selecting fittings for your bathroom. Why? Get it right and every day you will enjoy a wonderful showering experience that suits your needs.

Shower tapware requires planning and a good understanding of the household's needs before selection can take place; for example a family bathroom shower needs to have an element of water efficiency for high use and also deliver a good shower in a short time frame.

Think about who will actually use the shower as the tapware will need to meet the needs of all of its users. Consider the following:

- Rail length
- Position
- Adiustability
- Spray pattern
- Water usage

Understanding your water pressure and selecting the correct mixer helps to make your shower experience more efficient and pleasurable.

Unequal Pressure is a common situation for renovated homes. Your shower mixer will need to equalise the higher flow of the cold to the hot before it can deliver a comfortable shower temperature for the lower pressure. There are many options available and we can help you find the right solution.

Mains Pressure is the ultimate in water efficiency and function - if you get the opportunity to upgrade your water system to Mains, it will prove to be a good investment that will not disappoint. Most taps will work well on Mains pressure. WELS Rating is a great tool to guide you for water efficiency.

Ask the experts at Mico. If you get the opportunity, try before you buy!

SHOWERS

DESIGN CONSIDERATIONS

When considering what kind of shower you want, think about the dynamics of the space and size available. Ask yourself about usability and what kind of door or entry system is required. With many technical features like multi-jets and showerheads, showers range from economical efficiency to the all-out decadence of a total body spa. One thing to look for in a quality shower is a high tile tray lip to provide a good water seal.

FUTURE PROOFING SHOWERS

the shower area and acquire the services of a reputable installer. Important - the shower needs to be watertight against the walls. All shower options available in New Zealand will stand the test of time, providing they are installed correctly and offer a NZ safety standard for the glass. It gets increasingly expensive to make changes, as each stage is completed. TIP - put extra bracing in the walls if you think you may want to add a grab rail, shelf or seat later on. A glass door or screen requires good bracing. Stand in the space to mark out where you want the shower nozzle to come from and a comfortable height for the mixer.

When you're at the planning stage of the bathroom, consider all options for

If you want a tiled recess for soaps, shower gels and shampoos, that needs to be considered before the lining goes in. It will be too late once the walls are tiled.

You may want a spacious shower but will you be warm with all that airflow around you - select a fan heater and extractor suitable for the size of your bathroom (pg 96)

The team at Mico can recommend qualified installers they work with who can not only complete your installation but help you plan your shower space. maximising your needs now, and in the future.

SHOWER WALL OPTIONS

There is a variety of wall options for you to choose for your shower.

Frameless showers - create space and simplicity against a tiled wall. Note that frameless showers may leak water through the gaps between the glass and tiles unless a drip strip is added.

Flat, side & corner contours - one piece, seamless acrylic wall lining for your complete storage system and easy cleaning.

Acrylic walls - many options available with a variety of sizes, with or without corner soap and shelf recess and shaving foot rests, all for easy cleaning.

BATHS

DESIGN CONSIDERATIONS

Bathrooms come in many different shapes and sizes and so do baths. So when designing your new bathroom make sure that the bath you want fits. Not all walls can be assumed to be absolutely vertical or square so make sure that you measure the distance between the walls at the height at which the bath will be at its longest and widest. Also when measuring unplastered or untiled walls make sure you take the finishing depth into account before choosing a bath.

Baths are the essence of luxury for the homes of today. It could very well be the deal-breaker for buying a home. Bathing can help you relax and wind down at the end of a busy day and offers routine to a family with small children.

Consider style, function and materials when choosing a bath.

- · Style drop-in or freestanding.
- Function bubble massage, spa, hydro, chromatherapy.
- Materials used acrylic, poly marble, quarry cast, stone composite, pressed steel, lithocast and cast iron.

BASINS

DESIGN CONSIDERATIONS

A basin can often be a pivotal feature. It allows you to cater for your bathrooms' functional needs, whilst helping you achieve that cutting-edge look that you may have seen in a magazine.

Basins and vessels need to be practical, attractive and accessible to everyone. Consider who will be using it. Will it just be for washing hands and cleaning teeth, or will there be a man using it for a wet shave? The installation and positioning are important when interpreting these needs, so try before you buy if possible. Options such as self-rimming, vessel, undercounter, inset, wall hung or pedestal offer solutions to all requirements.

Basins come in many styles from traditional to minimalistic and come in a variety of materials such as china, cast bronze, brass, glass, composite stone and guarry cast. They offer a warranty of five years or more.

Note: Vessel basins require non-standard basin mixers, such as wall mounted or tall basin mixers.

TOILETS

DESIGN CONSIDERATIONS

How do you know which toilet is going to suit you? It's best to sit on them. Sometimes a toilet can look fabulous in design, but it is not really that comfortable. Test how the seat lifts. Some seats are warmer and softer to the touch. Thankfully soft closing seats are now included with most toilet suites.

No one toilet fits all. Talk to the team at Mico: they are here to find the right solution for you. Toilets come in a variety of styles, it is important to choose the right one to suit your bathroom.

Back to Wall - These toilet suites sit flush to the wall therefore the inlet and waste pipes can be concealed and cleaning is easy.

Close Coupled - The toilet cistern sits near the wall and the rear of the pan is offset from the wall.

Wall Hung / Wall Faced - Only the toilet pan is visible and the cistern is concealed behind the wall.

Comfort Height Toilets - Increased pan height for your comfort.

ACCESSORIES

DESIGN CONSIDERATIONS

Many accessories are now designed with a bathroom range in mind and a focus on aesthetics as much as technical functionality – they are designed to match particular tapware, toilets and sanitary-ware.

These are the finishing touches for your bathroom, so don't skimp, and make sure the style is in keeping with the other products.

If it's a new build, make sure you advise the builder of where you want to place the accessories so extra wood can be put behind the wall for added strength.
